After Inhalation: Supply fresh air. If required, provide artificial respiration by qualified medical personnel. Keep patient warm. Consult doctor if symptons persist.

After Eye Contact: Remove contact lens if worn. Rinse opened eye for 20 to 30 minutes under running water. If symptoms persist, consult a doctor.

After Skin Contact: Remove all contaminated clothing. Immediately wash affected skin with lukewarm water and soap, rinse thoroughly (20 min.). If skin irritation continues, consult a doctor.

After Swallowing: Rinse out mouth and then drink plenty of water. Do not induce vomiting. Call for medical help immediately.

Notes to Physician: Treat symptomatically

Wash hands before breaks and at the end of work.
Avoid contact with the eyes and skin

8.3 Personal Protective Equipment:

Eye Protection: Safety glasses with side shields, goggles preferred.
Respiratory Protection: Use suitable respirator protective device in case of insufficient ventilation, required if TLV exceeded.. Use suitable respiratory protective device when dust and fumes is formed. NIOSH/MSHA respirator is advised.
Protection of Hands: Protective gloves: to avoid skin problems, the glove material has to be

impermeable and resistant to the product/ the substance/ the preparation. Reccommended glove material: Neoprene, butyl rubber gloves, note: the selection of the suitable gloves does not only depend on the material, but also on the further marks of quality and varies from manufacturer to manufacturer several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application. Protective gloves should be replaced at the first signs of wear. The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
Skin and Body Protection: Choose body protection according to the amount and concentration of the dangerous substance at the work place. An eyewash and safety shower stations should be available in the work area.
